How to order your BugBarrier

To determine what size your trees are, measure the circumference of your tree at chest height and call us with the appropriate size found below*. **Same price as last year!**

Past recommended tree species for wrapping has been changed from a select few to all deciduous trees due to the severity of the infestation. If your trees were completely defoliated last year, we recommend the double wrapping. Replacement costs are for wraps that become overloaded with the grubs. There is a minimum charge of \$95 for any home.

* Small: 6"-36"= \$21 for single wraps or \$36 for double wraps. \$15 per for replacements.

* Medium: 37"-72"= \$42 for single wraps or \$72 for double wraps. \$30 per for replacements.

* Large: 73"-120"= \$70 for single wraps or \$120 for double wraps. \$50 per for replacements.

* Extra Large: 120"+ = \$70 + \$7 per foot or \$5 per foot for double bands.

Heartwood guarantees it's bands for 60 days from installation with **one** free return trip to repair squirrel or weather damage. Not for damage from dogs, children or vandalism.

We will return and remove the bands for an additional \$5.00 per band, any size after May 1st.

Group discounts available for 5 or more neighbors working together.

We will be installing both types of banding, **Bugbarrier** and **Tanglefoot**. We will decide which type to install on your trees based on the size and shape of the trees. Generally, **Bugbarrier** will be installed on trees with round trunks and **Tanglefoot** on trees with indentations, multiple leaders or extremely small size. There may be cases where we will combine the 2 types of treatment or just use one. We encourage you to monitor your bands and call with concerns.

Don't Hesitate, Call Today To Protect Your Trees! Deadline for ordering is November 1st.
